GRIHO members at Interacción 2012

Today [Interacción 2012](http://interaccion2012.umh.es/en/) [<http://interaccion2012.umh.es/en/>] started in Elche. It is the 13th annual unstopped conference, being the main conference for Spanish-speaking HCI community hold by [Asociación Interacción Persona-Ordenador, AIPO](http://www.aipo.es/) [<http://www.aipo.es/>]. Today Llúcia Masip, Josep M^a Brunetti and Montserrat Sendín presented their advancing research works (respectively, UX evaluation based on heuristics, interacting with semantic web and the use of Eye Traking with mobile devices). On Friday, Mireia Ribera will present other advances (perception of accessibility errors).
